

Rachel Carson Distinguished Lecture

*Sustainability, Discounting and
Cooperation:
The Need for New Institutions*

Dr. Simon A. Levin

Thursday, December 10, 2009 at 3:30 pm
Packaging School Building—PAC 100 (Auditorium)
Reception to Follow

Dr. Levin is a world-renowned ecologist and environmental scientist. He is the George M. Moffett Professor of Biology in the Department of Ecology and Evolutionary Biology at Princeton University. Dr. Levin has received numerous highly prestigious honors and awards, such as membership of the National Academy of Sciences, Kyoto Prize in Basic Sciences, Dr A. H. Heineken Prize for Environmental Sciences, first Okubo Lifetime Achievement Award, and the Distinguished Scientist Award from the American Institute of Biological Sciences. He is also receiving an Honorary Degree of Doctor of Science from Michigan State University on December 11th.

The Rachel Carson Distinguished Lecture Series is organized by the Center for Systems Integration and Sustainability (www.csis.msu.edu), Department of Fisheries and Wildlife with support from the National Science Foundation; Office of the President; Office of the Provost; Office of the Vice President for Research and Graduate Studies; Graduate School; Environmental Science and Policy Program; College of Agricultural and Natural Resources; Michigan Agricultural Experimental Station; Center for Water Sciences; Sustainable Michigan Endowed Project; Science, Technology, Environment, and Public Policy Specialization; and Elton R. Smith Endowment.
